

# KINCAID

## *“Alaska Encounter”*

By Howard Wand

### **Foreword:**

There are defining moments in time that separate themselves from all others. They dramatically impact and alter the course of our life. For Captain Kevin Kincaid, this was his moment in time.

A covert high-level advanced military weapons test is being conducted at a secluded base outside of Fairbanks, Alaska. It goes array when an unknown strike force attacks the scientific team, killing one of the scientists.

Captain Kincaid is the skilled leader of an elite Special Forces unit that was assigned to protect the scientists. His highly trained team was normally not given a routine stateside assignment, but they take every mission very seriously. He and his unit eliminate several of the attackers, and are in hot pursuit of the remaining force. Kincaid knows they must be captured, to learn who was behind the attack.

While under heavy fire from the fleeing assailants, he is separated from his team and forced to leave his vehicle. Wounded and struggling to survive, he is soon lost in the heavy snowstorm as he pursues the perpetrators into unfamiliar territory. Suddenly he stumbles upon something beyond his imagination or comprehension. It involves technology and personnel he never dreamed existed. Kincaid's mind is rattled as he tries to find and deal with the attackers, while sorting out his amazing and incredible discovery.

“Kincaid – Alaska Encounter” is a page turning action packed novel about one man’s incredible adventure and personal war on terror. You will burn the midnight oil to unravel the mystery surrounding his experience while “lost” in Alaska, and what caused the significant change in his abilities.

Hold your breath for a hair-raising ride in this first book in a series of “Kincaid” novels. Can one man make a difference?
